Prefabricated glatthaar basement

The best foundation for your home

Welcome to glatthaar prefabricated basements

The ultimate foundation for your home

Founder:
Joachim Glatthaar

Welcome to glatthaar. Our family business was founded back in 1980 and has since become an award winning, market-leading specialist in prefabricated basements and foundations. We deliver over 4,500 basements each year, Europe-wide.

In addition to basement construction, we are also experts in planning, statics, earthworks and overall project management. We guarantee absolute adherence to deadlines, security and quality, every time.

We are continually working on new and innovative solutions, undertaking extensive independent research and product development. We also work alongside several respected institutes and universities on developing the next generation of 'intelligent basements.'

You are our top priority

We are here for you

As an experienced construction company, we design and build every basement to be 'one of a kind' and completely bespoke. We aim to make the construction process straightforward and stress free, focusing on providing you with an exceptional service and a quality product. We'll support you at every stage; from start to finish, and beyond. A personal advisor will be on hand when you need them to answer any questions you have, even after completion.

As a result, we've been awarded the 'Best Recommendation Rate' in Germany's Most Customer-Friendly Service Provider Awards. Customers have also awarded us with a 'Very Good' grade in the prestigious FOCUS Money survey.

”

"We were supported at every stage by glatthaar's expert project managers and construction team, who helped us immensely with their professionalism and excellent service. In our experience, their customer service is faultless."

(Torsten R., 10.09.2014)

Your wish is our command

Making your space count

Whatever you intend to use your basement for, whether it be an office, sauna, studio, playroom or a practical space to hide away your appliances, we can create the perfect solution. Rest assured, it will be completely waterproof, even under the most extreme conditions. This means the finished product will be a healthy living area which also adds value to your home.

Why not see for yourself? We would be happy to welcome you to our headquarters in Schramberg, where our demonstration basement has been floating for over a decade.

We follow through on our promises

We build your design

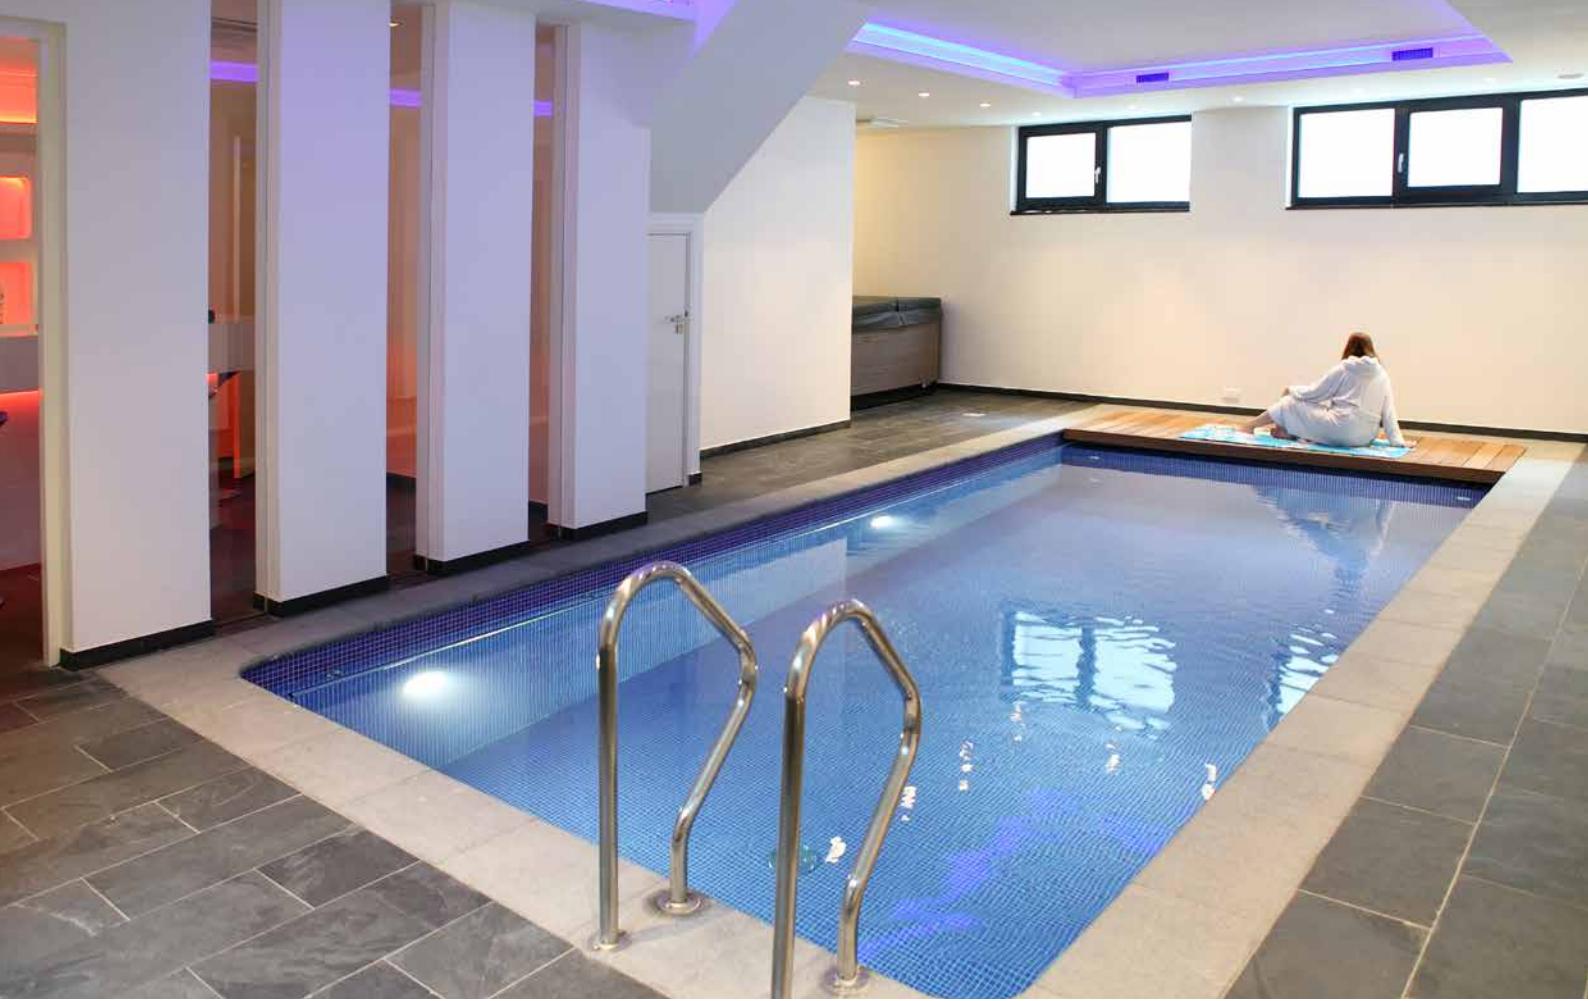

We strongly believe that quality matters. As a result, we're committed to creating a superior finished product and leaving nothing to chance. We are on hand to provide detailed explanations whenever needed and will help you determine the solution that will best suit your overall needs. Thinking about building your own basement? Contact us now to find out more.

”

“We are extremely pleased. Everything was great from the initial setup to the final walkthrough. The team was extremely competent and professional.”

(Maurice W., 20.09.2014)

We're here to help

We work to your schedule

We love basements, and we strive to be the number one company in basement construction both today and in the future. We have a fantastic team of over 500 people committed to providing creative ideas, planning and project execution. Our practical expertise and specialist on-site experience enables us to construct the best finished product, quickly and efficiently, every time.

Question:

"What could we do better?"

Answer:

"Nothing – everything was perfect for us."

The project manager was always available and answered all our questions. The construction team was very friendly and took time to properly answer our questions."

(Florian W., 09.08.2014)

Building is a matter of trust

Glatthaar guarantees quality

Quality is our number one priority and we construct our basements with extreme precision in state-of-the-art fabrication facilities.

All glatthaar prefabricated basements bear the RAL seal for inspected building materials and optimal quality. Moreover, we are the first and only basement construction company to have been awarded the TÜV-certified [German Association for Technical Inspection] in the area of "Inspected planning documentation".
